We don't sell light. We help you create experiences through light

Since 1994, ON THE SPOT has had one simple mission: to make your store environment and your products look as stunning as possible. That's what keeps us moving forward. Keeps us experimenting. Constructing. Illuminating. And that's what makes us proud, when we enter a retail store somewhere around the world: to see our light make the difference. To see our light push the sales.

That's what you get when working with us. We don't sell light. We help you create experiences through light.

Experiences, that sell your product.
